- **Operating Temp.** 0° to 49° Celsius (32° to 120° Fahrenheit)
- **Case Finish** Black powder coating

## DC-Digital DC-256S Clock Description

The DC-Digital Clocks are designed to be used in any application where a clock is needed. This unique design can be used in either existing buildings or new construction. DC-Digital clocks can be used as stand-alone non-system clocks, or can be linked via most master clocks to form a hourly and a 12-hour automatic correction system. Using DC-Digital accessories, these clocks may be adapted to existing flush-mounted back boxes.
