### **DC-Digital 2.3 inch Six-digit Universal Timer/Counter Description**

The DC-256UT is designed to be used in an industrial or commercial environment where a large highly visible display is needed. The DC-256UT can be used as an elapsed time or a chrono timer. All of the digits are 2.3 inches in total height and displays accurately and intelligible up to 120 feet away. The DC-256UT can be used in a wide variety of applications with little or no additional equipment. It can be displayed on a wall surface or on a table top. It comes standard with a 15VDC wall transformer that will adapt to European voltage standards.
