- **Weight** 40 pounds
- **Power Source** 120VAC at 850mA, 240VAC at 425mA
- **Operating Temp.** 0° to 49° Celsius (32° to 120° Fahrenheit)
- **Accuracy** +/- 2 seconds per 30 days
- **Case Finish** Exterior Grade Powder Coat (Tuxedo Black)

DC-Digital DC-40TZ5 Description

The DC-Digital DC-40TZ5 is designed to be used in any application where a multiple time zone digital clock is needed. Each time zones' minute and second is controlled by a designated master time zone (half hour time zones can be accomadated). This unique design allows full flexibilty of each time zones hours settings. The DC-40TZ5 is battery backed up to allow for time retainage during power failure. Mounting hardware is included to accomodate any wall mount or desktop mount application.
