DC-80N-IN Description

The DC-Digital [DC-80N-IN](#) time of day clock is designed to be used in any application where any 4 digit network time of day clock is needed to be seen. It automatically queries NTP once every 10 seconds and on power up. It can be set up for 12 or 24 hour time format (default is 12 Hour). It can be set up for static IP to receive the NTP from your server (default is DHCP). This unique design can be used in either existing buildings or new construction. This equipment is proudly made in the USA and is factory serviceable.

DC-80N-IN Mounting and Dimensions

There are (2) adjustable keyhole mounting tabs for easy attachment to a wall.
