[DC-25-OEM](#) Description

The DC-Digital [DC-25-OEM](#) is designed to be used in static signage where an LED display will increase sign impact, replace repetitive manual tasks, or adds a dynamic visual. The flexibility of design suits the [DC-25-OEM](#) to many diverse applications such as permanent or movable signage, trade show booths, spectacular visual displays, safety scoreboards, production timers, industrial andon displays, digital readouts, mobile command centers, purpose built vehicles, vending machines, arcade games and kiosks. The [DC-25-OEM](#) adds dynamic, aesthetic and attention grabbing visual appeal to any sign or display. It is proudly manufactured and assembled in the USA by employees who value high quality and customer satisfaction.

[DC-25-OEM](#) Mounting and Contents

The [DC-25-OEM](#) has been designed as a complete unit that can easily be mounted in a sign face without requiring specialized training or electrical knowledge. Each display is enclosed in an aluminum back box and comes with:

- (1) Instruction Manual
- (3) Templates for 3 different mounting methods and control access
- (4) Auto-Alignment pins with nylon pan head machine screws, size #6-32 x 1", accommodates materials up to 3/4" thick.
- (1) [PS-12-700](#) power supply
- (3) mini jumpers
- (1) 2 AA battery holder with adhesive backing (batteries not included)
- (1) translucent red, polycarbonate lens face
